

We are hiring a Project Architect / Senior Architect / Senior Technologist to join our growing team in southwest London.

We are an award-winning architecture, interior design, and project management studio specialising in high-end residential design and delivery. From concept to completion, we create homes of lasting quality for discerning clients, blending creativity with technical rigour and commercial insight.

With a strong pipeline of luxury projects across London, we are looking for an experienced, hands-on architect who can help lead the studio's design team – driving both project excellence and studio performance at this exciting stage in our growth.

### **About you**

You are a confident, organised architect with strong leadership experience in high-end residential projects. You are as comfortable running projects as you are supporting others to do the same – mentoring junior staff, managing internal resources, and helping improve processes.

You combine creativity with a commercial mindset, understand the demands of HNW and UHNW clients, and have a clear grasp of how to maintain project profitability while delivering outstanding results. You lead with clarity, communicate with warmth and authority, and thrive in a fast-paced, design-led environment.

### **Key responsibilities**

- Lead multiple projects across all RIBA stages, from concept to completion
- Oversee client presentations, drawing packages, technical detailing, and specifications
- Take ownership of resourcing and time planning across your team (experience with Harvest or similar a plus)
- Support team members through mentorship and day-to-day guidance
- Monitor project profitability and ensure that scope and fees are proactively managed
- Oversee contract administration and liaise with consultants and contractors on site
- Maintain quality across all deliverables, ensuring design integrity and technical compliance
- Uphold Project London's standards of design, communication, and professionalism

### **Required qualifications**

- Degree in Architecture / Technology
- Strong experience across all RIBA stages, particularly in luxury residential projects
- Proven ability to lead project teams, both in-studio and on-site
- Excellent knowledge of UK building regulations, contract administration, and construction methods
- Confident managing clients, consultants, and contractors
- Highly proficient in Vectorworks (2D)
- Skilled in Adobe InDesign and Microsoft Office
- Experienced with (or open to learning) time-tracking and resource planning tools
- Detail-oriented, process-driven, and commercially aware

### **Why join Project London?**

- Competitive salary, based on experience
- Hybrid working model: 3 days in our Parsons Green studio, 2 days remote
- 25 days' holiday per year, plus office closure over the Christmas break

- Be part of a collaborative and forward-thinking team
- Meaningful career progression opportunities as the studio grows
- Direct influence over design direction, delivery, and studio culture

### **How to apply**

- Step 1: Complete our short application quiz [here](#)

*This should take no more than 20-30 minutes. Please note only candidates who complete the quiz will be considered for interview.*

- Step 2: Submit your CV and portfolio to [info@projectlondon.co.uk](mailto:info@projectlondon.co.uk)

### **Important information**

- Applications are open only to candidates already based in London with the right to live and work in the UK
- Due to the volume of applications, we will only contact shortlisted candidates
- The role is available immediately, though we understand that notice periods may apply
- No recruitment agencies, thank you
